SUMMARY

Tech Delivery Manager — **22+ years** in software, **12+ years leading Agile programmes** for global financial services clients in regulated environments — now specialised in **delivering GenAI & Agentic AI programmes**. Currently leading an **agentic RAG platform on Azure for Deloitte US** (Azure OpenAI, Durable Functions agents, Neo4j knowledge graph). Dual profile: I run the programme — scope, budget, governance — *and* build the systems (public hybrid-RAG and multi-agent code), while using GenAI to run delivery itself. Teams of 50+ across Scrum/Kanban pods; Waterfall→Agile transformations; CMMi L5 governance. **PMP®** · **PMI-ACP®** · **SFe® 6** · **CSM®** · executive AI/ML alumnus, **IIM Visakhapatnam**.
